

AQUAACTIV WATER ANALYSIS PROFI-SET

Professional drop solution for determination of 8 important water parameters - use the online water analysis tool for safe monitoring of the measured values

With the water analysis products the water values can be quickly and easily determined. But what are the next steps? In addition to the extensive user instructions, the Online Laboratory is available, giving you a digital analysis of your pond measurements and assisting in the usual pond problems you may encounter. The individual values, and their significance are explained via the Info buttons.

Click “Start Water Analysis” for an immediate overview of whether your values are in order, not ideal or possibly even dangerous. Of course, the right products for rectifying the problem will also be directly recommended.

pH GH KH NO₂ NO₃ PO₄ NH₄ NH₃
